The second screenshot shows the 'RX/Forward Rules/Fax Box' menu with the following items: RX/Forward Rules, Rule of forward setting, and Fax Box. The 'RX/Forward Rules' option is highlighted.

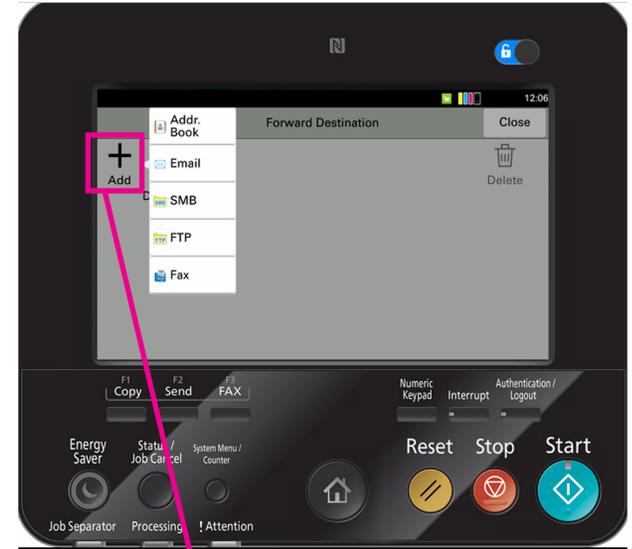

FAX FORWARDING TO EMAIL

Choose Use Rule for All RX

Turn on Forward Settings then click on Forward Destination.

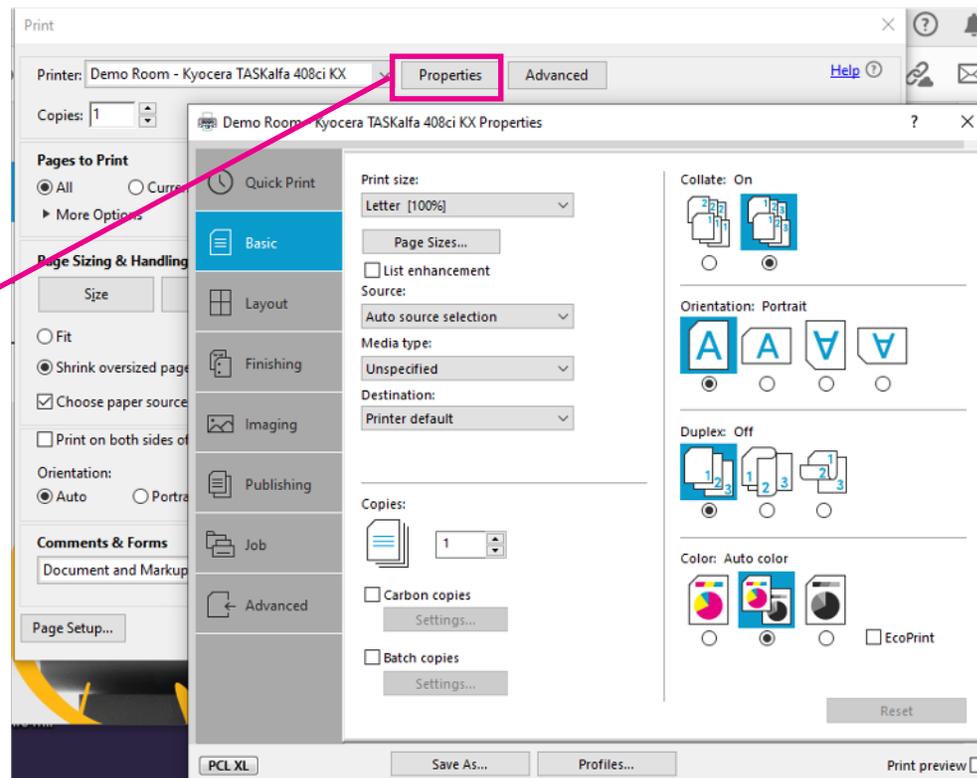

Add an email destination.

KX PRINT DRIVER OVERVIEW

The KX Driver for Windows® environments was the industry's first "single interface" print driver. This innovative design offers the same basic look and feel to the user regardless of the Windows operating system (OS.) This interface is also accessible with a Mac driver.

Click File/Print, choose the Kyocera KX driver then click on Properties.

KX PRINT DRIVER OVERVIEW

The screenshot shows the 'Demo Room - Kyocera TASKalfa 408ci KX Properties' dialog box. It features a left sidebar with tabs: Quick Print, Basic, Layout, Finishing, Imaging, Publishing, Job, and Advanced. The 'Basic' tab is selected. The main area is divided into two columns. The left column contains settings for Print size (Letter [100%]), Page Sizes..., List enhancement, Source (Auto source selection), Media type (Unspecified), Destination (Printer default), Copies (1), Carbon copies, and Batch copies. The right column contains Collate (On), Orientation (Portrait), Duplex (Off), and Color (Auto color). At the bottom, there are buttons for 'Save As...', 'Profiles...', 'Print preview', 'OK', and 'Cancel'. The Kyocera logo is at the bottom left.

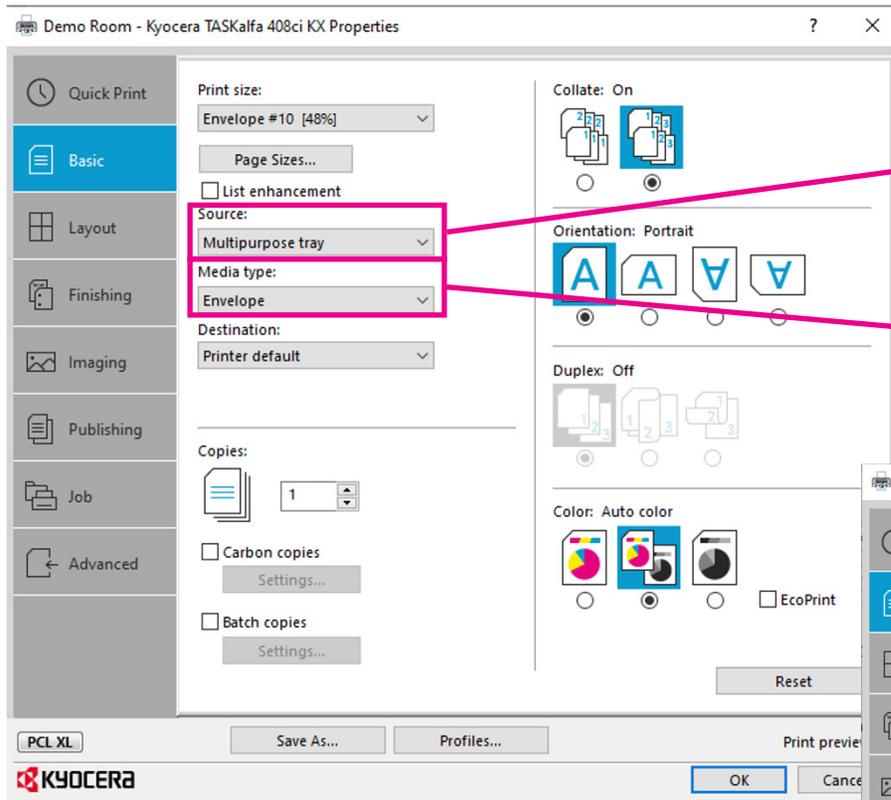

The Basic Tab is the default view. This tab has the primary features all on one page.

The Left Column includes Print Size, Paper Source, Media Type, Output destination, number of copies, batch copies.

Save as and Profiles are for saving setting presets.

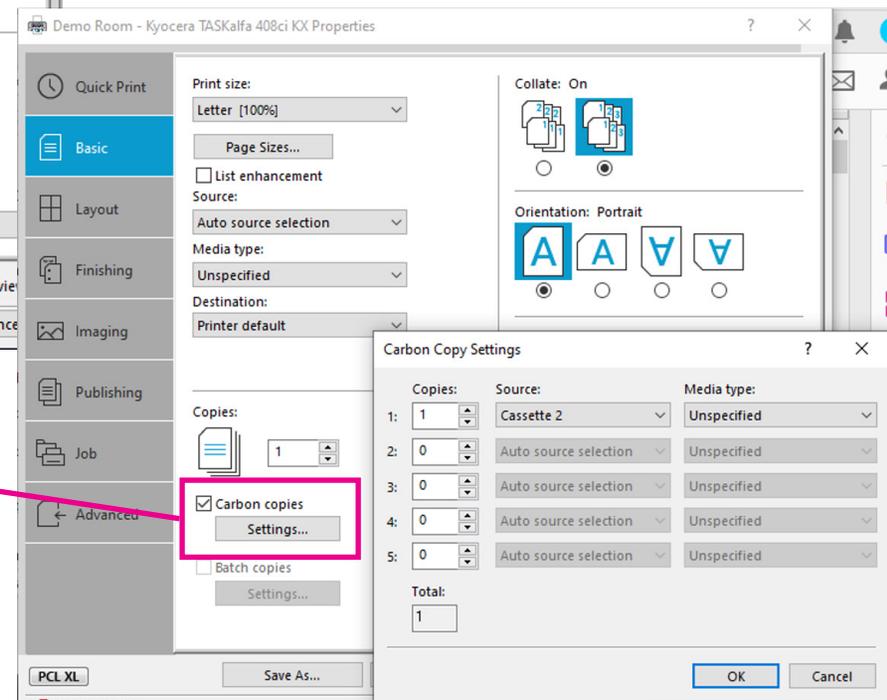

The Right Column includes Collating, Print Orientation, Duplexing, Color/B/W mode.

KX PRINT DRIVER OVERVIEW

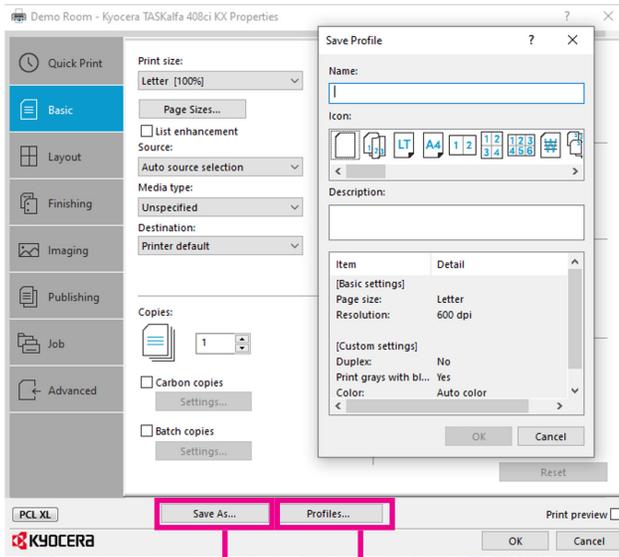

To change a paper source from auto, drop down and choose a cassette or the Multipurpose Tray.

Media Type includes a list of media options.

Carbon Copy option allows up to 5 different carbon copies.

KX PRINT DRIVER OVERVIEW

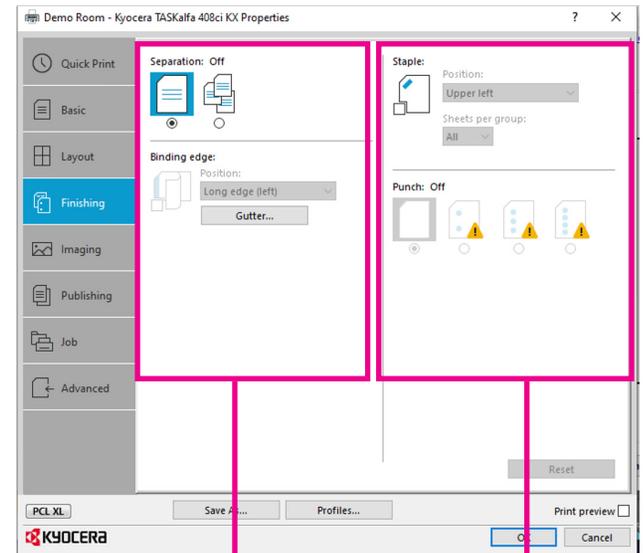

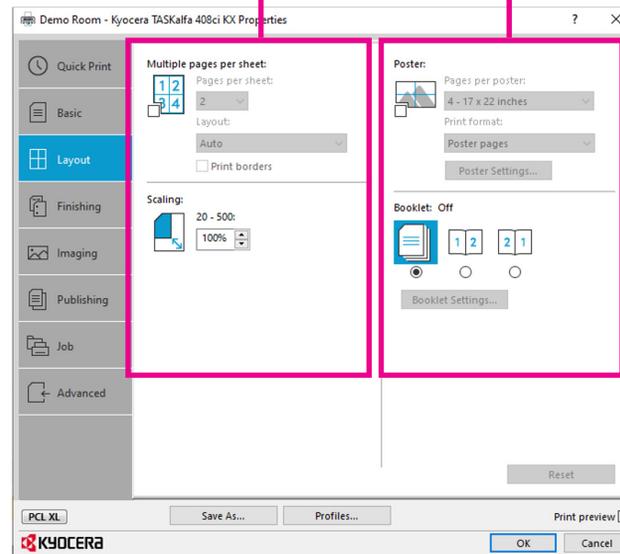

LAYOUT TAB
The left column includes combining multiple pages per sheet and Reduction/Enlargement.

LAYOUT TAB
The right column includes Poster mode creating booklets.

Save As creates Setting Presets for easy retrieval. After setting up a print job, click Save as then Name the job.

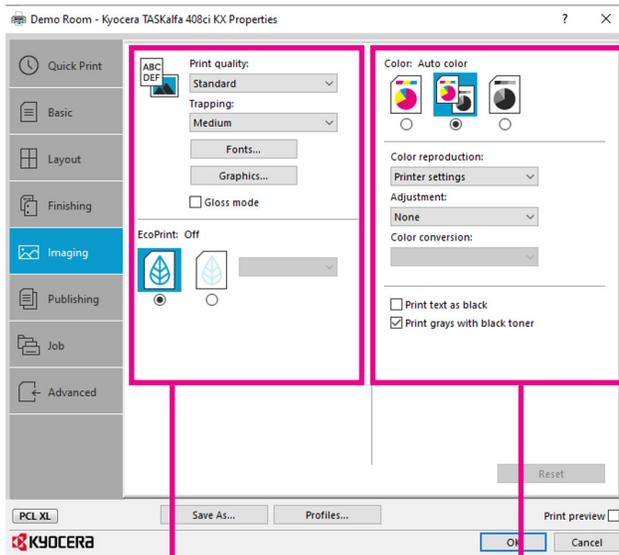

To retrieve the Saved Profile click on Profiles.

FINISHING TAB
The left column includes Separation (off-set) And Binding/ Gutter adjustment (adjusting the binding edge.)

FINISHING TAB
The right column includes Staple mode/position options and Hole Punching.

KX PRINT DRIVER OVERVIEW

IMAGING TAB

The left column includes Print quality adjustment options and EcoPrint.

IMAGING TAB

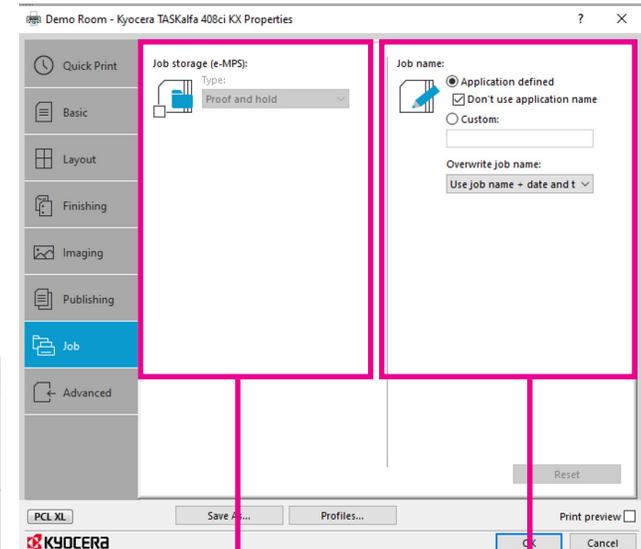

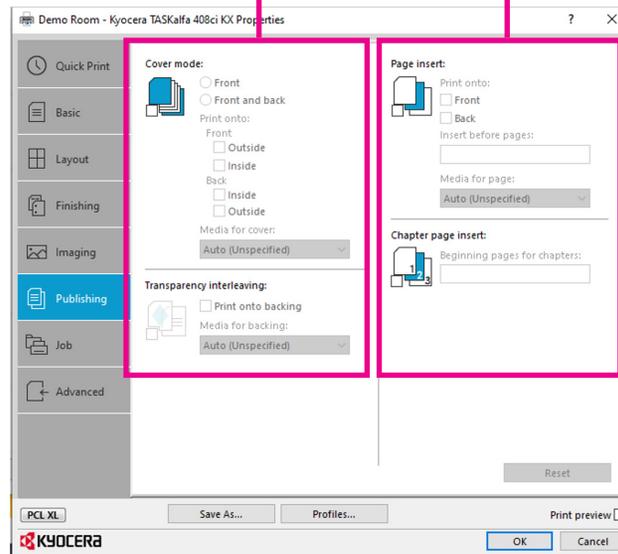

The right column includes Color/Auto Color/BW selection and Color adjustments.

PUBLISHING TAB

The left column includes Cover insertion mode and Transparency Interleaving.

PUBLISHING TAB

The right column includes Page insertion and Chapter page insertion.

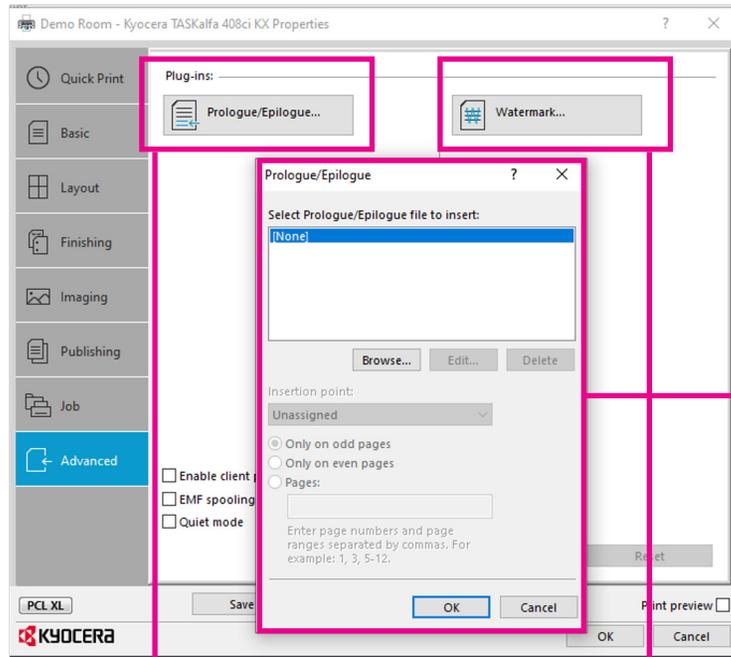

JOB TAB

The left column includes Job Storage options such as proof and hold and private print.

JOB TAB

The right column includes Job name options and customizing the job name.

KX PRINT DRIVER OVERVIEW

JOB TAB

The left column includes Prologue/Epilogue.

The right column includes Watermark options.

The Prologue/Epilogue feature lets you insert a command file at the beginning of a print job or at the end.

The command file, prepared in a text editor, utilizes programming commands from the printer resident PRESCRIBE language.

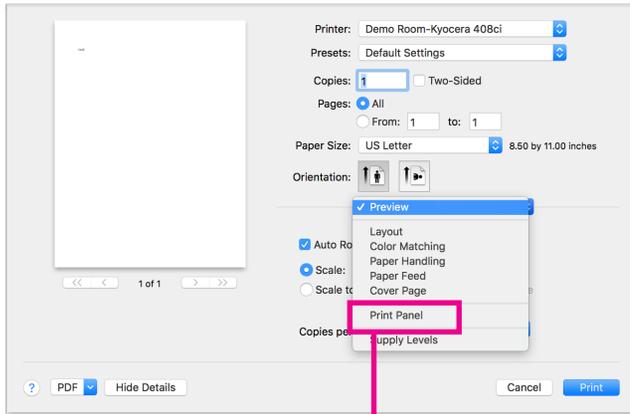

A command file is a set of instructions the printing system interprets to produce a given output. For example, a Prologue/Epilogue command file may contain a macro that places a graphic object such as a logo at the top of a letterhead document. Or a heading can be added to carbon copies when using the Carbon copies feature in the Basic tab.

A Prologue/Epilogue file must be available on your computer before it can be added to a print job.

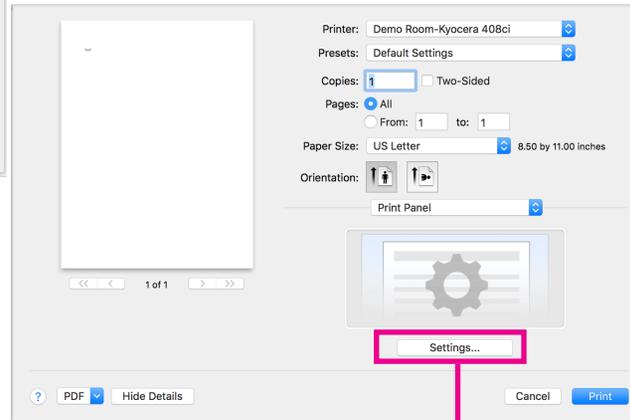

To create this file, use a text editor like Windows Notepad.

KX PRINT DRIVER OVERVIEW

Accessing KX driver view on Mac

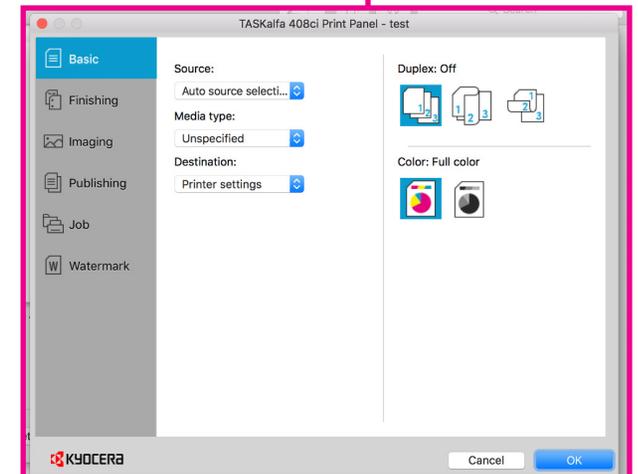

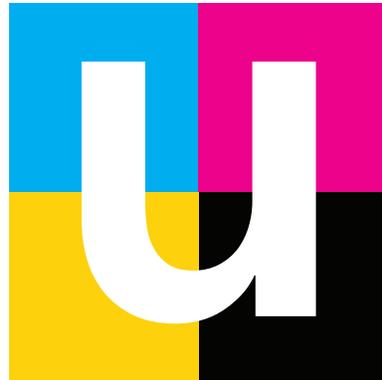

From the Mac driver click on the drop down that says Preview and choose Print Panel.

Next, Choose Settings.

After Choosing Setting, the KX driver look will appear with the same look and feature set.
